

No 464 Michigan Ave.  
Chicago Ill

February 25th 1893

Prof. J. C. Booth

Dear Sir & Friend

This will introduce to you  
my oldest son, who for several years  
has been the principal assistant in my  
Laboratory, both as regards practical  
work <sup>in</sup> as instructor.

He wishes to see <sup>us</sup> become informed  
of the processes used by the Govt in  
your Mnt for smelting, melting, <sup>or</sup>  
refining both bullion & ores. If you  
have the authority so to do, <sup>we</sup> will permit  
him to be present at the conduct of  
the several processes used for these  
purposes, you will, by granting him  
this privilege, very much oblige

Your old pupil  
Jas. D. Slattery.
